Where Strongest Tide Winds Blew (Classic Reprint)-Robert McReynolds 2018-01-20 Excerpt from Where Strongest Tide Winds Blew We built our cabin high on the slopes Of the Sangre de Christo range, overlooking the broad, level San Luis Valley, in Colo rado. At the rear of the cabin rose a tow ering cliff or rather a huge Slab Of rock standing edgewise more than two hundred feet high, apparently the upheaval of some mighty convulsion Of nature in ages gone. Near the base Of this cliff flowed a clear crystal Spring. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Calamity-Karen R. Jones 2020-02-04 A fascinating new account of the life and legend of the Wild West's most notorious woman: Calamity Jane Martha Jane Canary, popularly known as Calamity Jane, was the pistol-packing, rootin' tootin' "lady wildcat" of the American West. Brave and resourceful, she held her own with the men of America's most colorful era and became a celebrity both in her own right and through her association with the likes of Wild Bill Hickok and Buffalo Bill Cody. In this engaging account, Karen Jones takes a fresh look at the story of this iconic frontierswoman. She pieces together what is known of Canary's life and shows how a rough and itinerant lifestyle paved the way for the scattergun, alcohol-fueled heroics that dominated Canary's career. Spanning Canary's rise from humble origins to her role as "heroine of the plains" and the embellishment of her image over subsequent decades, Jones shows her to be feisty, eccentric, transgressive—and very much complicit in the making of the myth that was Calamity Jane.

The Essential Naturalist-Michael H. Graham 2011-05-15 Like nearly every area of scholarly inquiry today, the biological sciences are broken into increasingly narrow fields and subfields, its practitioners divided into ecologists, evolutionary biologists, taxonomists, paleontologists, and much more. But all these splintered pieces have their origins in the larger field of natural history—and in this era where climate change and relentless population growth are irrevocably altering the world around us, perhaps it's time to step back and take a new, fresh look at the larger picture. The Essential Naturalist offers exactly that: a wide-ranging, eclectic collection of writings from more than eight centuries of observations of the natural world, from Leeuwenhoek to E. O. Wilson, from von Humboldt to Rachel Carson. Featuring commentaries by practicing scientists that offer personal accounts of the importance of the long tradition of natural history writing to their current research, the volume serves simultaneously as an overview of the field's long history and as an inspirational starting point for new explorations, for trained scientists and amateur enthusiasts alike.
